

INDUSTRIAL DISPUTES MAY 1972 (PRELIMINARY)

Reference No. 6.27

May 1972 This bulletin contains statistics of industrial disputes for the month of and some previous periods. More information about these disputes will appear later in the detailed quarterly mimeograph "Industrial Disputes" (Reference No. 6.6).

2. The statistics of industrial disputes refer only to disputes involving a stoppage of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly involved are employees thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may be estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

3. Stoppages of work at different points of time and at different establishments due to the same cause may be regarded as one industrial dispute. However an industrial dispute occurring in more than one State is counted as a separate dispute in each State. A dispute involving workers in more than one industry group in a State or Territory is counted once only in the number of disputes - in the industry group that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industry groups. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes. Any discrepancies between totals and sums of components are due to rounding.

4. For statistics of industrial disputes for earlier periods see "Labour Report No. 55, 1970" (Reference No. 6.7).
